

SceneCam™ Mobile

Vehicle Video Surveillance System

Advanced Detection Technology's SceneCam™ Mobile Vehicle Video Surveillance System captures and stores up to four channels of images, enabling surveillance of the front, rear, left, right or interior of any vehicle.

- > > Monitor and record security threats while driving or stationary.
- > > Ideal for law enforcement and public transportation, such as taxis and buses
- > > Four high-resolution digital cameras — available in handheld or fixed configurations — link to Tablet PC or Notebook computer
- > > Cameras zoom to focus on areas of key concern
